ScaleX Cohort

Call for Startups

The “ScaleX Cohort”, a collaboration between iHub Anubhuti-IIIITD Foundation & IIIITD Innovation & Incubation center is providing entrepreneurs seed funding to advance and scale up their venture to the next level.

The startups can apply on the website of IIIITD Innovation & Incubation Center or IHub or through the application link - <https://forms.gle/MH24t2BUp15iQrYbA>.

The initiative is offering seed funding up to INR 50 lakhs to nurture and support tech start-ups mainly in **Cognitive Computing & Social Sensing, Health, Law Enforcement & Security, Education, and Environmental Sustainability.**

The application process had started from 4th April 2022, and has extended till 4th May 2022. The program has received 12 applications and will begin on 6th June 2022.

The criteria of the evaluation process for the seed funding of startups are based on the parameters such as their business model and description, the product or services provided, marketing strategies, their target market and competitors

Early Stage Startups can Apply

Also, evaluated based on their scalability plans. Internal evaluation by domain experts is also considered.

PREVIOUS WEBINAR SERIES

Prof. Moshe Y. Vardi

Rice University

Title: Machine Learning and Logic: Fast and Slow Thinking

Date: March 14, 2022

Computer science seems to be undergoing a paradigm shift. Much of earlier research was conducted in the framework of well-understood formal models. In contrast, some of the hottest trends today shun formal models and rely on massive data sets and machine learning. A canonical example of this change is the shift in AI from logic programming to deep learning.

Prof. Ramesh Raskar

MIT

Title: Making Invisible Visible with Data, ML and Devices

Date: May 4, 2022

The presentation covers research from patient-scale to population-scale in all 3 domains, physical: diagnostic devices and imaging, computational: automated and private machine learning and health markets, and global: social networks, environmental sensors and geospatial analysis.
